

Gudauri

Georgia

Gudauri is a fast growing resort region that offers visitors a wide variety of recreational activities in the mountains. In addition, the unforgettable vistas with their fascinating colorful diversity and the region's hospitality attract visitors from near and far. Gudauri lies at 2,196 m above sea level, 120 km from Tbilisi near the Jvari Pass, one of the main crossings in Georgia. The ski season in Gudauri lasts from December to mid-April. Snow levels up to 1.5 m are found on the slopes. Regardless of the altitude, the weather here is almost always warm and sunny.

Gudauri

Georgia

The project in an overview:

Management software	Freemotion.Logic, sweb.Cockpit
No. of POS terminals	5 POS terminals, with 5 Coder Unlimited units; 3 OPOS terminals

Information media	Keyticket Light in Gudauri look Keycard Basic in Gudauri look Key Tix
No. of mini hubs	7
No. of data centers	1
Miscellaneous	skiline

Gudauri boasts 16 km of marked ski slopes groomed by snow equipment. The pros can use slalom, giant slalom, Super-G and downhill slopes. All pistes are FIS-certified. In addition, Gudauri offers visitors a range of freeriding options – downhill runs through virgin snow. The deep snow, absence of cliffs, and no risk of avalanches – are features that have made Gudauri a Mecca for off-piste skiing. There are also many opportunities for backcountry and heli skiing close by the resort. SKIDATA has played a major role in the growth of the Gudauri region. Thanks to access and control systems from SKIDATA visitors to Gudauri enjoy an even more convenient vacation. The region itself has also benefited from the added security as well as the increasing flow of ski enthusiasts.

Highlights of the Project

- The project management was handled entirely by SKIDATA.
- RFID cards are used exclusively, and customers select the format of the cards.
- A unique solution that meets the needs of the region.
- Convenient, efficient system for selling tickets to guests of the resort.
- Two types of turnstiles: Freemotion and 370i.
- With the help of SDRDM, the operating company for the facilities can easily generate reports and statistics.
- skiline altimeter diagram since the 2011/2012 season
- Management.Services: sweb.Cockpit provides information in real-time
